

EDUCATIONAL ROOFING WORKSHOP

This educational workshop will serve as an introduction to the standards and testing that occurs behind the scenes in developing roofing products and systems.

THURSDAY JUNE 6, 2019

4:00-6:30 PM

TREMCO CLEVELAND ROOFING PLANT

3361 EAST 80TH STREET

CLEVELAND OH 44127

Educational Roofing Workshop

June 6, 2019

Abstract:

To learn some of the standards and innovative technologies occurring in the roofing industry.

Overview:

This is an introduction to process improvements that enhance the quality and longevity of products in the field; there will also be a demonstration of testing for fire in roof assemblies to meet strict UL guidelines.

You will learn about innovative technologies to preserve existing roofs; install clean, near odorless systems for sensitive facilities; and enhance the return on your capital investment.

Learning Objectives:

Attendees will learn:

- 1. How fire ratings are tested and rated by UL by attending a live burn of a mock-up roofing system.*
- 2. Bio-based, urethane liquid roofing membranes and how they are an excellent low-odor solution suitable for sensitive environments.*
- 3. The importance of UV and traffic protection provided by the surfacing granules on modified bitumen membranes and how it is affected by granule loss.*
